

Wally Drip Irrigation - 1/4" Supply Line

1. The 1/4" supply line can feed a maximum of 10 Wally Fives, as shown, or equivalent combination of Wally Ones and Wally Threes.
2. You can connect a maximum of 2 Wally Fives horizontally, as shown, or equivalent combination of Wally Ones and Wally Threes.
3. Tuck the drip line behind Wally's tongue at soil level.
4. When installing pockets horizontally, overlap Pockets so that every two Pockets share one wall anchor.
5. Image shown consists of 10 Wally Fives, 10 Wally Five drip kits, 1 supply line kit, and 1 automatic timer.

Wally Drip Irrigation - 1/2" Supply Line

Note: Use this kit when building a vertical garden that has more than 50 Living Wall Planters or more than 50 Wally Ones or more than 16 Wally Threes or more than 50 Wally Fives. The added diameter of this Drip Line can supply enough water for 200 planters.

1. The 1/2" drip supply line can feed a maximum of 40 Wally Fives, as shown, or equivalent combination of Wally Ones and Wally Threes.
2. You can connect a maximum of two Wally Fives horizontally, in series as shown, or equivalent combination of Wally Ones and Wally Threes.
3. Tuck the Wally drip line behind Wally's tongue at soil level.
4. When installing pockets horizontally, overlap pockets so that every two pockets share one wall anchor.
5. Image shown consists of 40 Wally Fives, 40 Wally Five Drip Kits, one 1/2" drip supply line kit, and one digital drip timer valve.
